# SOLUTIONS FOR CHARTER, PRIVATE, HOME AND RELIGIOUS SCHOOLS

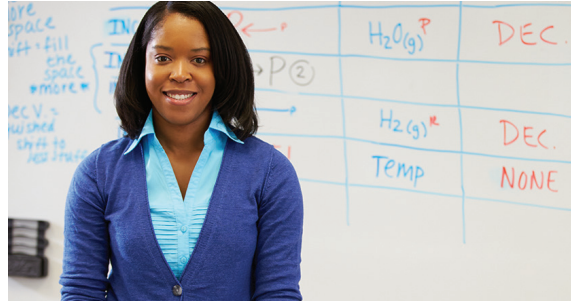

## For Administrators & Staff

School administrators and staff can create, modify, and store admission requirements, student data, school-wide reports, as well as student, teacher and parent communications. Super user Administrative login privileges and industry compliant secured access provide administrators with the necessary control over the daily tasks of the school's operation. A comprehensive attendance manager automates manual tallying and data entry which frees up staff time to focus on more strategic efforts.

Lunch programs are a lifeline for keeping children nourished and ready to learn. Accurate documentation daily can be challenging at best. A meals manager automates meal tracking and also provides a check and balance against attendance records prior to audits, ensuring your school's continued funding via error-free audits.

## The Best School Solution

## For Teachers

Teachers have more control at their own keyboard. They can create online as well as offline assignments and generate randomly selected online and offline exams. Online assignments are graded by the system and final grades are made available for teachers in their grading sheets. Online grading sheets calculate averages, GPAs, assignment weights and fill in students' final grades. No need for everyone to get the same assignment either. Teachers have flexibility to assign homework to different students in the same or different classes, grades and courses.

### Wave Options

**99¢** PER STUDENT PER YEAR PER OPTION

- ✓ Full Class Room Schedule
- ✓ School Meal Program
- ✓ Online Registration & Admission
- ✓ Alert Messaging (Text, Phone\*)
- ✓ Volunteer Tracking (coming soon)
- ✓ Tuition Tracking (coming soon)
- ✓ Custom Development Available on a Project Basis
